The Profitability Leaks in Your 2026 Budget

Your 2026 Budget Has a Hidden \$19.1M Leak

Most CFOs think profit risk lives in the market or economy.

- Wrong! It's sitting in your leadership ranks.

One discipline – **Leadership Resources Management** – can uncover toxic leaders, fix misaligned assignments & promotions, and keep your best people from walking to your competitors.

Toxic Leaders Cost You Between \$14.6M – \$54M Annually*

Every organization has at least one toxic leader

They "manage up" and deliver results—but destroy teams from within

- Mid-level toxic leader cost: \$180K–\$450K per year
- Rock stars with toxic behavior: \$1M+ per year drain

* For a 1,200-person organization with 30% in leadership positions.

"Poor management disengagement costs U.S. businesses \$500 billion annually" — Gallup

Organizations Get 82% of Leadership Assignments & Promotions Wrong*

Promotions based on functional expertise, not leadership readiness

A brilliant individual contributor ≠ a great people leader

Result: Disengaged teams, poor performance, unnecessary turnover

Cost per misaligned leader:
\$12,000/year in lost engagement

- Totals \$3.5M annually for a 1,200-person organization

* According to a study by Gallup

Your Best Leaders Are Your Most Marketable Leaders

Top performers leave for lack of purpose, development, and appreciation—not money

Replacement cost: 1–2x their annual salary (often more for leaders)

Losing one high-potential leader cascades through your pipeline

Example: 10% high-performer loss rate \times \$150K avg salary = \$1.0M annually*

* For a 1,200-person organization with 30% in leadership positions.

\$19M in Profit Leaks. Three Fixes. One Strategy.

Your 2026 budget may be locked

It's not too late to build a **Leadership Resources Management** strategy that pays dividends in 2026 and beyond.

- Reveal & address toxic leaders: \$14.6M
- Reduce leadership misalignment: \$3.5M
- Retain top leadership talent: \$1.0M

Calculate the Impact on Your Organization

Use our online, research-based calculator to capture the impact of toxic leaders, misalignment and loss of high performers on your organization's bottom line.
